perplexity

To Whom It May Concern,

It's my pleasure to recognize Rakindi Charan Babu, who served as a VIP Campus Partner in Perplexity AI's global Campus Partner Program. Perplexity is one of the world's leading AI search engines, serving over 30 million users and 1 billion monthly queries worldwide. Our Campus Partner Program empowers exceptional student leaders to advance adoption of Comet, our AI-powered browser, across campuses.

Out of a global cohort of student leaders, Rakindi was selected as a VIP Campus Partner, a distinction reserved for top performers who demonstrated measurable impact. During the program, Rakindi worked directly with our growth and education teams to drive awareness of Comet on their campus through creative outreach, student partnerships, and on-campus activations that reached thousands of peers.

We're proud to have Rakindi among our VIP cohort and value their contributions. They exemplify the kind of initiative and creativity that make a meaningful impact in both marketing and community, and I'm confident they will bring the same dedication to any opportunity.

Sincerely,

Ashna Porbanderwala
